

Building Confident Creative Problem Solvers

- Small group discussion
- We need to be Confident Creative Problem Solvers
- Give consistent relevant challenges related to who they are
- Giving them ability to try on their own and work it out
- Listening to and considering everyone's ideas (even crazy ones)
- Start small, model and build on it.
- Fail forward, analyze and learn from mistakes, it's OK to make mistakes
- There is no single best answer. (except on NYS tests)
- Provide experiences related to real life with multiple tools.
- Give them choices, ability to pursue their own ideas
